

IN THE SPECIFICATION

ITEM # 1

The Examiner stated in the Office Action...

"1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75 (d)(1) and MPEP § 608.01(o).

Correction of the following is required: The specification fails to mention a "clamp mechanism" (found in original claim 8 and new claims 15 and 20) or a "beveled edge" (found in original claim 8)."

In response to Item #1 "the clamp mechanism", the specification and drawings have been modified to include reference to a "clamp mechanism 28".

In regards to the beveled edge, "beveled edges" are referred to in paragraph [11] of the Original Application "As illustrated, the attachment includes a curved front surface 11 with "beveled edges" attached to a base 12." We modified the drawings and specification to clearly identify a top beveled edge 26 and a bottom beveled edge 27.
